

**Memo No.** 2018-019  
**Date:** 04-May-2018  
**Memo To:** Clients  
**Re:** Test Revision – Citrate & Oxalate, Timed Collections

Effective 4 June 2018, reporting of non-random, timed urine Citrate and Oxalate will be revised.

The “24-hour collection” tests will be revised to allow submission of non-24-hour timed collections. Please note that results are calculated to reflect 24-hour output and there is no change in reference ranges or recommended collection duration, i.e. a 24-hour collection is preferred. The report will show the Collection date and duration, timed collection volume, 24-hour volume, 24-hour creatinine excretion and 24-hour Citrate (or Oxalate) excretion.

Please revise your processes to ensure that the collection date and collection duration (in hours) is always provided, even when submitting a 24-hour collection. In addition, please always provide the collected volume (in litres).

There will be no change in the random (spot) urine tests.
