

Memo No. 2018-030
Date: 23-Jul-2018
Memo To: Clients
Re: Website Revision – 25-Hydroxy-Vitamin D

Earlier this year paediatric reference ranges were introduced with 25-hydroxy Vitamin D analysis at Mount Sinai Hospital, Toronto. Unfortunately, ranges indicated in ICL Memo 2018-007 issued on January 30th, 2018 and in the website document included some errors in the paediatric values.

Reference ranges posted on the ICL website have now been revised and are available here: <http://www.hicl.on.ca/documents/VitD-25OH-RefRanges-V02.pdf> or via a link on the 25-OH Vitamin D test page.

There is no change in method or test site.

***** Please note that all reports issued for 25-OH Vitamin D have included the correct reference values and flags and therefore no incorrect reports have been issued by ICL. This includes reports in all formats.**

The correct reference values are (nmol/L):

- 0 - <3 months: 55-168
- 3 months - <6 months: 55-165
- 6 months - <9 months: 55-161
- 9 months - <1 year: 55-158
- 1 year - <2 years: 55-152
- 2 years - <3 years: 55-146
- 3 years - <4 years: 55-142
- 4 years - <5 years: 55-139
- 5 years - <6 years: 55-136
- 6 years - <7 years: 55-133
- 7 years - <11 years: 55-131
- 11 years - <18 years: not defined
- 18 years and above: 75-225
