

Memo No. 2021-005
Date: 01-Mar-2021
Memo To: Clients
Re: *Various*

Test Revision: Hemoglobin Fractionation, Blood

The reporting of hemoglobinopathy investigation is being revised effective immediately.

There is no change in method.

- Reporting units are revised from “fraction” to “%” for HbA, HbF and HbA2
- The adult Hb F reference value is revised from < 3% to < 1.1%
- Result fields have been added for reporting Cellulose Acetate chromatography and Molecular Studies (if performed).

Methylmalonic Acid, Plasma or Random Urine

The website listings for these two tests have been reviewed and updated by adding the HL7 Codes for interfaced clients. Please note that they remain routinely available to all clients with no pre-authorization required.
