Re: *Porphyrim - New Test*

New Test

[Porphyria Screen by Fluorescence Scanning, Plasma](#)

This is a new screening test. Plasma fluorescence is a sensitive test for Variegate Porphyria, as well as useful to help diagnose and differentiate between other forms of porphyria.

This test does not fractionate and measure individual porphyrin varieties. [Porphyrim Quantitation and Fractionation, Serum/Plasma](#) should be ordered if detection and measurement of individual porphyrim is required. Please ensure your requisition clearly indicates the desired analysis.
