

Memo No. 2023-014
Date: 23-Mar-2023
Memo To: Clients
Re: *Various: C1q, CIC, C1EST, Venlafaxine, Neutrophil Ab*

We have added C1q antibodies and quantitation tests to the online Test Catalogue. Now listed:

- [Anti-C1q Antibodies IgG, Serum](#) (antibodies directed against C1q)
 - [Complement Component C1q, Serum/Plasma](#) (quantitation of C1q protein)
 - [Immune Complexes, Serum/Plasma](#) (This test does not quantitate C1q protein but the assay utilizes C1q binding to assess circulating immune complexes)
-

We have added C1 esterase inhibitor antibodies to the online Test Catalogue.

Available for investigation of C1 esterase inhibitor disorders:

- [C1 Esterase Inhibitor - Antigen, Serum](#) (quantitation of the protein)
 - [C1 Esterase Inhibitor - Functional, Plasma](#) (functional activity of the protein)
 - [C1 Esterase Inhibitor Antibodies, Plasma](#) (antibodies directed against the protein)
-

Venlafaxine and Metabolites testing is available as

- [Venlafaxine and Metabolite \(UPLC-MS/MS\), Serum/Plasma](#) (Canadian service)
- [Venlafaxine and Metabolite \(LC-MS/MS\), Serum](#) (US service with faster turnaround time)

Please unambiguously identify the required test. This practice is aligned with accreditation requirements. This is best done by providing the ICL Test ID as displayed in the online Test Catalogue under the test name.

(Please note that there will be a delay in processing orders that do not unambiguously distinguish between these two tests while ICL contacts you to determine which test is required.)

[Neutrophil Antibodies, Serum](#) by flow cytometry is now offered as a routine service at Quest Diagnostics.

(*Neutrophil-Associated Antibodies, Serum* at ARUP Laboratories will no longer be offered as a routine service.)

If you have further questions, please contact Client Care at (416) 422-3000 Ext. 300 or info@ICLabs.ca
