

Memo No. 2023-015
Date: 30-Mar-2023
Memo To: Clients
Re: *Various : sIL-2r, Mitotane, ZinT8 Ab*

Interleukin-2 (IL-2) Receptor - Soluble (CD25), Plasma testing has resumed at Hospital of Sick Children, Toronto. (The temporary alternate service at Cincinnati Children's will not be routinely offered.)

Available tests for IL-2 receptor include:

[Interleukin-2 \(IL-2\) Receptor - Soluble \(CD25\), Plasma](#)

[Interleukin-2 Receptor Alpha Chain \(IL-2Ra/CD25\) Soluble, Serum](#)

Mitotane GC, Serum/Plasma at Quest Diagnostics is available.

Mitotane testing is available as:

[Mitotane HPLC-UV, Serum/Plasma](#) (Canadian service)

[Mitotane GC, Serum/Plasma](#) (US service with faster turnaround time)

Please unambiguously identify the required test. This practice is aligned with accreditation requirements. This is best done by providing the ICL Test ID as displayed in the online Test Catalogue under the test name.

(Please note that there will be a delay in processing orders that do not unambiguously distinguish between these two tests while ICL contacts you to determine which test is required.)

ICL Online Test Catalogue Update

The following test has been added to the online Test Catalogue.

[Zinc Transporter 8 \(ZnT8\) Antibodies, Serum](#)
