

Memo no.: 2023-050
Date: 20-Nov-2023
Memo to: Clients
Re: Various: A1AT Testing, Infliximab

A1AT Testing

[Alpha-1-Antitrypsin Genotype, Serum and Whole Blood](#) at St. Paul's Hospital, Vancouver is now available. Please refer to the online test catalogue for the details. **[Alpha-1-Antitrypsin Proteotype by LC-MS/MS, Serum](#)** and **[Alpha-1-Antitrypsin Phenotype by IFE, Serum](#)** are still available. Please unambiguously identify which test is requested. This practice is aligned with accreditation requirements. This is best done by providing the complete test name and/or as "ICL Test ID XXXX".

[Infliximab with Reflex Antibodies, Serum](#)

Date/time of last infusion is requested for this test to facilitate appropriate interpretation and to assist the test provider in troubleshooting unusual findings and in support of appropriate utilization (e.g., collection at true trough). However, type of Infliximab or duration of therapy is no longer requested as mandatory clinical information.

If you have further questions, please contact Client Care at 416-422-3000 ext. 300 or info@iclabs.ca
