

**Memo no.:** 2023-053  
**Date:** 29-Nov-2023  
**Memo to:** Clients  
**Re:** *Calcitonin Method Change*

---

Effective immediately, both *Calcitonin, Serum* and *Calcitonin, Fluid* services at Sunnybrook Health Sciences Centre are tested using a new platform (Roche e602). The method is now electrochemiluminescence. Specimen requirements are unchanged. However, there will be a reference range revision for serum calcitonin. The new ranges are:

- Male: <16 ng/L
- Female: <11 ng/L

There are no reference ranges available for fluid calcitonin.

HL7 codes and prices are not changed.

We apologize for the lack of a notice period for this revision.

---
