Memo to: Clients
Re: ***Vascular Endothelial Growth Factor D (VEGFD), Serum/Plasma -
Reference Interval Update***

Effective immediately, Cincinnati Children's Hospital (CDBI Diagnostic Immunology Laboratory) transitioned to a new testing platform for [Vascular Endothelial Growth Factor D \(VEGFD\), Serum/Plasma](#) testing, with updated reference intervals. Please note that EDTA plasma is an acceptable specimen in addition to serum.

The method change will measure Vascular Endothelial Growth Factor-D (VEGF-D) levels using an automated microfluidics immunoassay method, with results reported in pg/mL. Clinical decision thresholds for this methodology have not been fully established. Results should therefore be interpreted within the broader clinical context.

Test	Revised Reference Intervals
Vascular Endothelial Growth Factor D (VEGFD), Serum/Plasma	≤ 647 pg/mL

Due to the addition of this new result, please see updated HL7 Interface Order/Result codes:

Order Choice Name	Vascular Endothelial Growth Factor D (VEGFD), Serum/Plasma	
Order Code	VEGFD	
Result Code	Result Name	Units
66335	VEGF-D Quantitation	pg/mL

Please be advised that pricing has been revised for this test. Please contact Client Care for more details.
